

Recombinant 2019 nCoV Spike S1 (Fc&Avi Tag)

Cat. No. bs-46006P

Description

Protein Sequence 2019-nCoV Spike S1 with a Fc tag and Avi at the C-terminal (Gln14-Arg683).

Source Mammalian Expression System

Accession QHD43416.1

Mol wt The protein has a predicted MW of 102.6 kDa. Due to glycosylation, the protein migrates to 130-140KDa based on Bis-Tris PAGE result.

Endotoxin Less than 1EU per ug by the LAL method.

Purity > 95% as determined by Bis-Tris PAGE

Purity >95%as determined by HPLC

Activity assay Not tested.

Formulation and Storage

Formulation Lyophilized powder (Lyophilized from 0.22um filtered solution in 20mM PB (pH 7.4). Normally 5% trehalose is added as protectant before lyophilization.)

Storage The product should be stored at -70°C or -20°C.

Background

The spike protein (S) of coronavirus (CoV) attaches the virus to its cellular receptor, angiotensin-converting enzyme 2 (ACE2). A defined receptor-binding domain (RBD) on S mediates this interaction. The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity.

Assay Data

Tris-Bis PAGE

Recombinant 2019-nCoV Spike S1 protein on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

HPLC Data

The purity of 2019-nCoV Spike S1 is greater than 95% as determined by SEC-HPLC.

ELISA Data

Immobilized human ACE2, His Tag at 0.5ug/ml (100ul/Well). Dose response curve for Spike S1, Fc Tag with the EC50 of 0.1ug/ml determined by ELISA.
